Education

Ph.D., Economics (Quantitative Economics & Econometrics), University of Hawai‘i at Mānoa	2023 – 2027
M.A., Economics (en route to Ph.D.), University of Hawai‘i at Mānoa	2026
M.S., Quantitative Health and Clinical Research , John A. Burns School of Medicine, University of Hawai‘i at Mānoa	2024 – 2026

Research Interests

Health economics and policy; causal inference and applied econometrics for health and social outcomes; quantitative analytic methods for longitudinal cohort data with complex survey designs (weighting, stratification, replicate-weights variance estimation); population aging, frailty dynamics, and the joint determination of health and labor supply over the life course; disaster health economics and community resilience; quantitative health sciences and clinical research methodology, including cost-effectiveness analysis, psychometric measurement, and biomarker-integrated longitudinal study design; health equity and disparities.

Invited Contributions

- Zhang, Q. (Forthcoming). “Social Determinants of Health and Multidimensional Poverty.” In R. Baikady (Ed.), *The Palgrave Encyclopedia of Concepts and Theories in the Context of Global Poverty*. Palgrave Macmillan / Springer Nature.
- Zhang, Q. (Under review). “Multidimensional Poverty Index (MPI): Measurement, Health Deprivations, and Policy Use.” In R. Baikady (Ed.), *The Palgrave Encyclopedia of Global Poverty Research*. Palgrave Macmillan / Springer Nature.

Conference Presentations & Workshops

- Zhang, Q. (2026). “Working Through Frailty: Chronic versus Acute Health Shocks and the Margins of Labor Supply.” Southern Economic Association (SEA) 96th Annual Meeting, session “Health and Work,” Houston, TX, November 21, 2026.
- Zhang, Q. (2026). “Health Insurance Design and Work Exit After Chronic Disease Onset: Harmonized Evidence from the United States, England, and China.” Gateway Research Workshop on Cross-Country Comparisons (Gateway to Global Aging Data), held during the Gerontological Society of America (GSA) 2026 Annual Scientific Meeting, National Harbor, MD, November 4, 2026.

Research Experience

Graduate Research Assistant — UHERO, University of Hawai‘i at Mānoa 2024 – Present
Maui Wildfire Exposure Study (MauiWES) 2024 – Present
 NIH- and state-funded longitudinal cohort, in collaboration with UHERO, JABSOM, and UH Maui College.

- Analyzed mixed-methods data (biomarker, behavioral, socioeconomic) for 2,000+ participants in an IRB-compliant longitudinal study; generated individual-level risk forecasts informing disaster-recovery policy.
- Designed quantitative instruments and contributed to participant recruitment protocols for ongoing cohort waves; acknowledged contributor to the team’s 2025 *JAMA Network Open* study of health and social support after the Maui wildfires.

Kaiona Survey Project 2025 – Present
 Youth health and well-being survey and program evaluation, in partnership with Wai‘anae Coast Comprehensive Health Center.

- Built Qualtrics consent, demographic, survey, and intake instruments; cleaned and managed survey data; produced pre–post data reports for three youth summer programs.

Roots Reborn Program Evaluation 2025 – 2026
 Post-wildfire economic empowerment intervention.

- Designed and executed full evaluation of an IRB-approved human-subjects intervention: Qualtrics survey design → matched-panel construction → pre–post causal analysis → executive summary for policymakers.
- Built session-level evaluation framework linking program costs to quality-adjusted participant outcomes, producing a submission-ready manuscript with actionable policy recommendations.

Small Business Success in Honolulu Study 2024 – 2025
 City & County of Honolulu Office of Economic Revitalization. Co-author of the UHERO report *Investigating and Tackling Barriers and Needs for Small Business Success in Honolulu* (2025).

- Built 4-module R causal-inference pipeline (PSM, IPW, Heckman selection, mediation), identifying heterogeneous treatment effects of financing barriers across business subgroups.

Research Allied Health Professional — The Queen’s Medical Center, Honolulu 2025 – Present

- Approved for data collection and analysis on an IRB-approved colorectal cancer study drawing on electronic health records and tumor specimens, in collaboration with the Department of Quantitative Health Sciences, JABSOM.

GBD Collaborator — Global Burden of Disease Study 2023, IHME, University of Washington 2025 – Present

- Provided substantive peer review and contributions for nine GBD 2023 estimation manuscripts spanning cancer, cardiovascular and neurodegenerative disease, metabolic disease, dietary and environmental risks, antimicrobial resistance, and population ageing.
- Contributions recognized with named collaborator-authorship on three GBD 2023 papers currently under review at *The Lancet Oncology*, *The Lancet Regional Health – Western Pacific*, and *The Lancet Primary Care*.

Teaching Experience

Instructor, ECON 321 Introduction to Statistics, Department of Economics, UH Mānoa Summer 2025
Teaching Assistant, Principles of Microeconomics (ECON 130) & Macroeconomics (ECON 131) 2023 – 2024

Awards & Honors

2026 Research Stipend, Department of Economics, University of Hawai‘i at Mānoa
2026 AWARD Network Summer Training Institute, University of California, San Francisco (NIA/NIH-funded)
2025, 2026 Burnham Campbell Fellowship Award, Department of Economics, University of Hawai‘i at Mānoa
2024 – 2026 Hung Family Fellowship, University of Hawai‘i at Mānoa (AY 2024–25 and 2025–26)
2023 Achievement Award, Department of Economics, University of Hawai‘i at Mānoa

Professional Service

Journal Peer Reviewer: *Public Health in Practice* (Elsevier), 2025–Present · *Aging* (Aging-US), 2026

Conference Abstract Reviewer: Gerontological Society of America (GSA) 2026 Annual Scientific Meeting, 2026

University Service: Reviewer, Graduate Student Organization Merit-Based Awards (Empowerment & Leadership category), University of Hawai‘i at Mānoa, 2026

Collaborator & Peer Reviewer, Global Burden of Disease Study 2023, Institute for Health Metrics and Evaluation (IHME), University of Washington, 2025–Present. Manuscripts reviewed (IHME ID): Global Type 1 Diabetes (5338)[†]; Antimicrobial Resistance in the WHO Western Pacific Region (4006)[†]; Global Colon & Rectum Cancer (4219)[†]; Global Environmental Exposures (6176); Global Dietary Risks (6115); Global Ageing and Non-Communicable Diseases (5410); Global Alzheimer’s Disease & Other Dementias (6217); Global Stroke (6155); Global Ageing and Inequality (5409). [†]Named collaborator-author.

Professional Memberships

American Economic Association (AEA) · American Society of Health Economists (ASHEcon) · International Health Economics Association (iHEA) · Society for Epidemiologic Research (SER) · Gerontological Society of America (GSA) · Hawaii Economic Association (HEA) · Pi Gamma Mu

Technical Skills

Statistical Software: R (tidyverse, fixest, modelsummary, survey, srvyr, ggplot2, Shiny), Stata 18 (including svy suite for complex-survey estimation), Python (pandas, statsmodels, scikit-learn), SQL, Git.

Complex Survey & Longitudinal Methods: Stratified multistage cluster designs, longitudinal and cross-sectional weighting, replicate-weights variance estimation (BRR, jackknife, Taylor linearization), wave-to-wave attrition adjustment, nonresponse weighting.

Causal Inference & Econometrics: Two-way fixed effects, difference-in-differences, instrumental variables (2SLS), event study designs, regression discontinuity, propensity score matching, inverse probability weighting, Heckman selection models, mediation analysis, sensitivity analysis (Oster 2019; Cinelli–Hazlett 2020), Lee bounds, specification curve analysis, wild cluster bootstrap, power analysis.

Machine Learning & Computational Methods: Double/debiased machine learning (DML), causal forests, LASSO/elastic net, multiple imputation (MICE).

Quantitative Health Sciences: Frailty index construction (Rockwood deficit accumulation), item response theory (IRT), confirmatory factor analysis (CFA), GAD-7/CES-D psychometric scoring, cost-effectiveness analysis (CEA/DCEA), survey design (Qualtrics).

Survey & Data Platforms: HRS, ELSA, SHARE, CHARLS, NHANES, MEPS, BRFSS, IPUMS (USA/CPS/International), ATUS, GBD.

Research Training & Certifications

CITI Program: Responsible Conduct of Research; Biomedical Research Investigators and Key Personnel; Non-Exempt Biomedical Researchers and Key Personnel (incl. IPS); Good Clinical Practice (2025–2026) · IHME Introduction to GBD (2025)
